**Subject:** Drinking water question in the Regional Strategic Plan  
**Attachments:** EPA Region 10 Regional Strategic Plan FY21 - ED.docx

Peter -- In building the Regional Strategic plan this year OECA dropped a request into the template regarding an SRF pilot in FY21 for drinking water. What do you know about it and/or think about it. My initial reaction to Dino is that for our Region with the new NCI for drinking water we have are hands full ramping up and changing how we work with WD and more importantly with our states. Although long term this seems like a good idea I'm not sure the timing is appropriate for our Region at least. Let me know your thoughts.

**Subject:** draft RSP for review

Ed,

The draft FY21 RSP is attached for your review; this is the only version of this file so you can edit as you see fit. A few things to note for you:

1. The inspection numbers and FTE table included is example only; our data will be available to you at Thursday's check-in.
2. Under SRF, you will note one comment requesting information on a drinking water enforcement review pilot in FY21. We felt it better to discuss with you in person how to address this request from OECA.
3. Our team met in your absence to discuss our blanket assumption related to COVID-19 impacts; it is highlighted in the second paragraph of the document.

Thanks to Morgan and Jeff for collaborating on this effort.
